PROJECTS

News App | *Javascript, React Native, Redux Toolkit, Reanimated*   GitHub
- Developed a news application with user experience and user interface in mind
- Utilized an HTTP REST API for searching and retrieving live articles from the web to serve back to the application
- Used the Reanimated library to provide smooth animations and intuitive interactions

Movie Swiper | *Javascript, React Native, Redux Toolkit*   GitHub
- Developed a sleek Tinder-style movie discovery application
- Fetched API data and served it to the front-end to allow users to see movie details, such as: ratings, trailers, pictures, and similar movies
- Implemented Redux Toolkit to handle the application's state management

Weather App | *React Native, Node.js, Express, Heroku*   GitHub
- Developed a weather application that presents current weather data to the user based off the users location or search entry
- Leveraged modern React hooks and context to write cleaner more concise code
- Set up a Heroku back-end server to handle API requests and serve data back to the front-end

The Green Guide Blog | *HTML/CSS, jQuery, Bootstrap*   Live | GitHub
- Developed a dynamic and interactive website with user experience in mind
- Implemented a responsive web page through a mobile first design approach
- Utilized jQuery to more efficiently manipulate the DOM

WORK EXPERIENCE

Shift Supervisor   Aug. 2018 – Present
Starbucks   *Lomita, CA*
- Collaborate alongside management cohesively to set goals and standards for store operations and communicate them back to the team
- Prioritize and delegate tasks to team to optimize efficiency and ensure store goals are met
- Evaluate and assess dynamic problems in the moment and create a plan of action to ensure best outcome
- Encourage teamwork and

Coding Instructor   Feb. 2014 - Aug. 2016
United Wilmington Youth Foundation   *Wilmington, CA*
- Prepare for and lead a weekly scheduled program to introduce students to the core concepts of computer science; including programming and logical thinking.
- Explored ways to give students a more hands on experience with more difficult programming concepts, resulting in a more engaging and concrete understanding of the lessons
- Hosted outreach programs to promote the program and excite others about the idea of coding.
